

TobiasBelch

SENIOR FULLSTACK ENGINEER

[linkedin.com/in/tobias-belch](https://www.linkedin.com/in/tobias-belch) | Berlin, Germany

about

Senior fullstack engineer with 17 years delivering end-to-end web platforms in healthcare, e-health commerce, and sustainability. Combines architecture ownership with hands-on execution across the entire stack — TypeScript, React, and Next.js on the frontend, Node.js and NestJS on the backend, with API design (REST, GraphQL) and data modelling at the core. Drives Design System initiatives and AI agent integration. Consistently sought out as a technical reference point — owns stakeholder communication in high-visibility situations and mentors engineers to raise collective quality and delivery speed.

skills

Frontend

TypeScript / JavaScript
React.js / Next.js
Redux / State Management
Material UI / Tailwind / SCSS
D3 / Data Visualisation
Jest / Cypress / Playwright

Backend & API

Node.js / NestJS
GraphQL / REST API Design
Backend-for-Frontend (BFF)
Docker / Containerisation
AMQP / Messaging Systems
LLM Integration / AI Orchestration

Leadership & Process

Technical Architecture & ADRs
Stakeholder Communication
Mentoring & Team Growth
Design Systems
Cross-Functional Alignment
Requirements Engineering

work experience

Senior Software Engineer – DocMorris

Berlin, Germany | 08/2023 – Present

Digital healthcare and online pharmacy platform in the German market.

- Architected and delivered a white-label platform migration; 3 brands onboarded to date.
- Drove full-stack architecture evolution across frontend, BFF, and API layers.
- Designed and led a cross-platform Design System, improving consistency, accessibility, and UX/Dev alignment; structured for AI-assisted UI generation.
- Led AI agent initiatives — optimising token usage, reliability, and response predictability.
- Improved test coverage and accessibility compliance across the frontend codebase.
- Mentored 5 engineers; onboarded new hires and raised team capability in TypeScript/React and full-stack best practices.

work experience

Head of Engineering – Made2Flow

Berlin, Germany | 12/2022 – 07/2023

Sustainability platform for fashion supply-chain decision support.

- Designed a next-generation domain data model from scratch with the CPO, replacing a fragmented model insufficient to support product use cases.
- Built and led a team of 4 engineers, including hiring 2.
- Owned technical partner communication and integration planning across the full-stack platform.

Technical Lead – eHealth-Tec GmbH

Berlin, Germany | 04/2020 – 11/2022

Digital health products for patients, doctors, and pharmacists.

- Built and owned the full-stack frontend and API layers of a white-label online pharmacy platform serving 2 clients in production (TypeScript, React, Next.js, Node.js, NestJS).
- Designed and implemented Backend-for-Frontend layers as anti-corruption boundaries (Node.js, NestJS) — owning the full request lifecycle from UI to backend services.
- Introduced and evolved a requirements-driven architecture process — replacing ad-hoc design with ADRs, design reviews, and structured refinement.
- Led stakeholder communication and cross-functional alignment for a team of 4 in a Scrum-lite setup.
- Mentored and onboarded engineers; grew team capability in TypeScript, full-stack architecture, and testing.
- Delivered a gematik-regulated browser-based e-prescription tool for physicians.

Head of Engineering – Medtower UG

Berlin, Germany | 09/2018 – 04/2020

Software and hardware solutions for hospital operations and visibility.

- Owned architecture and development of a real-time IoT platform — microservices, SPA, and live device tracking (Node.js, React, TypeScript).
- Designed a multi-device real-time communication system spanning IoT hardware, server, and web browser using AMQP 1.0 and Apache Qpid.
- Built 3D indoor multi-floor maps with live device location and status visualisation in an offline environment (OpenMapTiles).
- Led a team of 2 engineers; established requirements engineering, refinement process, and team knowledge base.
- Managed external Apache NiFi consultants for ETL pipeline delivery.

earlier experience

Software Developer – remind me GmbH

02/2018 – 08/2018

Authored the technical concept for the white-label product transformation — adopted and shipped after tenure. Implemented feature-toggle architecture with lazy loading for flexible multi-context deployment. Mentored junior and mid-level developers in a Kanban team of 5.

Software Developer – Cedavis Technology GmbH

08/2009 – 01/2018

Evolved sole ownership of full-stack architecture over 9 years — introduced Angular 1, then migrated to React and TypeScript as the stack matured. Built a custom D3 chart component library from scratch. Engineered a PDF reporting module using Java Nashorn to render React components server-side — enabling a single shared codebase for live UI and PDF output. Implemented data simulation and forecasting features for healthcare capacity planning.

languages

German (Native) · English (CEFR C-level)

education

Berlin University of Applied Sciences (BHT) 2007 – 2011

Bachelor of Science, Computer Science

certifications

iSAQB Certified Professional for Software Architecture – Foundation 05/2022

oose

Domain Driven Design 12/2021
