

TobiasBelch

LEAD / SENIOR SOFTWARE ENGINEER

linkedin.com/in/tobias-belch | Berlin, Germany

about

Lead and senior engineer with 17 years delivering web platforms in healthcare, e-health commerce, and sustainability. Combines architecture ownership with hands-on TypeScript, React, and Next.js execution across frontend and backend layers. Drives Design System initiatives and AI agent integration. Consistently sought out as a technical reference point across teams — owns stakeholder communication in high-visibility situations and mentors engineers to raise collective quality and delivery speed.

skills

Core

TypeScript / JavaScript
React.js / Next.js
Frontend Architecture
Node.js
Technical Leadership
Mentoring

Strong

Redux / State Mgmt

AI Agent Orchestration

Supporting

NestJS
D3 / Data Visualisation
AMQP / Apache Flink / NiFi
Java

work experience

Senior Software Engineer – DocMorris

Berlin, Germany | 08/2023 – Present

Digital healthcare and online pharmacy platform in the German market.

- Architected and delivered a white-label migration of the pharmacy platform; 3 brands onboarded to date.
- Drive frontend and BFF architecture evolution, shaping technical direction across the stack.
- Trusted for stakeholder communication in critical and high-visibility situations.
- Designed and led implementation of a cross-platform Design System, improving consistency, accessibility, and UX/Dev alignment; structured to enable AI-assisted UI generation.
- Drove AI agent initiatives across the engineering org — research and optimisation of token usage, reliability, and response predictability.
- Improved test coverage and accessibility compliance across the frontend codebase.
- Mentored 5 engineers; onboarded new hires and raised team capability in TypeScript/React best practices.

work experience

Head of Engineering – Made2Flow

Berlin, Germany | 12/2022 – 07/2023

Sustainability platform for fashion supply-chain decision support.

- Designed a next-generation domain data model from scratch with the CPO, replacing a fragmented model insufficient to support product use cases.
- Built and led a team of 4 engineers, including hiring 2.
- Owned technical partner communication and integration planning.

Technical Lead – eHealth-Tec GmbH

Berlin, Germany | 04/2020 – 11/2022

Digital health products for patients, doctors, and pharmacists.

- Built and owned the frontend of a white-label online pharmacy platform serving 2 clients in production (TypeScript, React, Next.js).
- Designed and implemented Backend-for-Frontend layers as anti-corruption boundaries (Node.js, NestJS).
- Introduced and evolved a requirements-driven architecture process — replacing ad-hoc design with ADRs, design reviews, and structured refinement.
- Led stakeholder communication and cross-functional alignment for a team of 4 in a Scrum-lite setup.
- Mentored and onboarded engineers; grew team capability in TypeScript, architecture, and testing.
- Delivered a gematik-regulated browser-based e-prescription tool for physicians.

Head of Engineering – Medtower UG

Berlin, Germany | 09/2018 – 04/2020

Software and hardware solutions for hospital operations and visibility.

- Owned architecture and development of a real-time IoT platform — microservices, SPA, and live device tracking (Node.js, React, TypeScript).
- Designed a multi-device real-time communication system (IoT hardware, server, web browser) using AMQP 1.0 and Apache Qpid.
- Built 3D indoor multi-floor maps with live device location and status visualisation in an offline environment (OpenMapTiles).
- Led a team of 2 engineers; established requirements engineering, refinement process, and team knowledge base.
- Managed external Apache NiFi consultants for ETL pipeline delivery.

earlier experience

Software Developer – remind me GmbH

02/2018 – 08/2018

Authored the technical concept for the white-label product transformation — adopted and shipped after tenure. Implemented feature-toggle architecture with lazy loading for flexible multi-context deployment. Mentored junior and mid-level developers in a Kanban team of 5.

Software Developer – Cedavis Technology GmbH

08/2009 – 01/2018

Evolved sole ownership of frontend architecture over 9 years — introduced Angular 1, then migrated to React and TypeScript as the stack matured. Built a custom D3 chart component library from scratch. Engineered a PDF reporting module using Java Nashorn to render React components server-side — enabling a single shared codebase for live UI and PDF output. Implemented data simulation and forecasting features for healthcare capacity planning.
