

TobiasBelch

FOUNDING / LEAD SOFTWARE ENGINEER

[linkedin.com/in/tobias-belch](https://www.linkedin.com/in/tobias-belch) | Berlin, Germany

about

Engineer and technical leader with 17 years of building products from whiteboard to production — across healthcare, e-health commerce, and sustainability. Combines architecture ownership with full-stack TypeScript, React, and Next.js delivery. Drives foundational infrastructure — Design Systems, domain models, BFF layers — that enables teams to move faster. Equally comfortable defining product requirements with a CPO, shipping UI, debugging a data pipeline, or leading AI agent initiatives. Trusted stakeholder communicator and engineer mentor in high-visibility, fast-moving environments.

skills

Core

TypeScript / JavaScript
React / Next.js
Frontend Architecture
Node.js / Full-Stack Delivery
Technical Leadership
O-to-1 Product Building

Strong

Redux / State Management
GraphQL / REST APIs / BFF
Material UI / Tailwind / SCSS
Jest / Cypress / Playwright
Docker / Git
LLM Integration / AI Agent
Orchestration
Domain-Driven Design /
Architecture

Supporting

NestJS
D3 / Data Visualisation
AMQP / Apache Flink / NiFi
System Design & Trade-offs

work experience

Senior Software Engineer – DocMorris

Berlin, Germany | 08/2023 – Present

Digital healthcare and online pharmacy platform in the German market.

- Architected a multi-brand white-label platform — 3 brands on a shared core.
- Drove frontend and BFF architecture — technical direction, buy-vs-build decisions, cross-team coupling.
- Designed and built a cross-platform Design System from scratch — improved UX consistency, enabled AI-assisted UI generation.
- Led AI agent initiatives across the org — tooling research, token optimisation, driving adoption.
- Mentored 5 engineers and established TypeScript/React practices that raised team velocity and quality.
- Trusted stakeholder communicator in critical, high-visibility situations.

work experience

Head of Engineering – Made2Flow

Berlin, Germany | 12/2022 – 07/2023

Sustainability platform for fashion supply-chain decision support.

- Designed a next-generation domain data model from scratch with the CPO, replacing a fragmented model that blocked product use cases.
- Built and led a team of 4 engineers — hired 2, established engineering processes from scratch.
- Owned technical partner communication and integration planning end-to-end.

Technical Lead – eHealth-Tec GmbH

Berlin, Germany | 04/2020 – 11/2022

Digital health products for patients, doctors, and pharmacists.

- Built and owned the frontend of a white-label online pharmacy platform from inception to production serving 2 clients (TypeScript, React, Next.js).
- Designed BFF layers as anti-corruption boundaries (Node.js, NestJS) — clean separation between core domain and client-specific surfaces.
- Introduced a requirements-driven architecture process — replacing ad-hoc design with ADRs, design reviews, and structured refinement.
- Delivered a gematik-regulated e-prescription tool — navigated regulatory constraints while maintaining velocity.
- Led stakeholder communication and cross-functional alignment for a team of 4 in a Scrum-lite setup.
- Mentored and onboarded engineers; grew team capability in TypeScript, architecture, and testing.

Head of Engineering – Medtower UG

Berlin, Germany | 09/2018 – 04/2020

Software and hardware solutions for hospital operations and visibility.

- Architected a real-time IoT platform — microservices, SPA, live device tracking (Node.js, React, TypeScript).
- Designed a multi-device real-time communication system (IoT hardware, server, browser) over AMQP 1.0 and Apache Qpid.
- Built 3D indoor multi-floor maps with live device tracking in an offline environment (OpenMapTiles).
- Led a team of 2 engineers — established requirements engineering, refinement, and knowledge base from scratch.
- Managed external Apache NiFi consultants for ETL pipeline delivery.

earlier experience

Software Developer – remind me GmbH

02/2018 – 08/2018

Authored the technical concept for transitioning the product to a white-label architecture — concept was adopted and shipped after tenure. Implemented feature-toggle system with lazy loading for flexible multi-context deployment. Mentored junior and mid-level developers in a Kanban team of 5.

Software Developer – Cedavis Technology GmbH

08/2009 – 01/2018

Evolved sole ownership of frontend architecture over 9 years — introduced Angular 1, then migrated to React and TypeScript as the stack matured. Built a custom D3 chart component library from scratch. Engineered a PDF reporting module using Java Nashorn to render React components server-side — enabling a single shared codebase for live UI and PDF output. Implemented data simulation and forecasting features for healthcare capacity planning.

languages

German (Native) · English (CEFR C-level)

education

Berlin University of Applied Sciences (BHT)

2007 – 2011

Bachelor of Science, Computer Science

certifications

iSAQB Certified Professional for Software Architecture – Foundation

05/2022

oose

Domain Driven Design
