

TobiasBelch

TECHNICAL LEAD

[linkedin.com/in/tobias-belch](https://www.linkedin.com/in/tobias-belch) | Berlin, Germany

about

Technical leader with 17 years of experience shaping architecture, defining technical strategy, and enabling engineering teams to ship durable, high-impact web platforms in healthcare, e-health commerce, and sustainability. Combines hands-on TypeScript, React, and Next.js depth with a track record of introducing architecture processes, driving design-system adoption, and leading cross-functional stakeholder communication in regulated environments. Consistently sought out as a technical reference — mentors engineers, raises collective quality, and translates business needs into actionable technical roadmaps.

skills

Technical Leadership

Architecture Ownership & Strategy
Stakeholder Communication
Mentoring & Team Building
Engineering Process Design
Cross-Functional Alignment
Design System Strategy

Core Engineering

TypeScript / JavaScript
React.js / Next.js
Node.js / NestJS
Frontend & BFF Architecture
GraphQL / REST APIs
State Management (Redux)
Jest / Cypress / Playwright
LLM Integration / AI Agent

Supporting

Docker / CI/CD
Material UI / Tailwind / SCSS
iSAQB SW Architecture (CPSA-F)
Domain-Driven Design

work experience

Senior Software Engineer – DocMorris

Berlin, Germany | 08/2023 – Present

Digital healthcare and online pharmacy platform in the German market.

- Architected a white-label pharmacy migration; 3 brands onboarded on a shared component + config layer.
- Drove frontend and BFF architecture evolution, shaping API contracts and technical direction.
- Led the design and adoption of a cross-platform Design System, improving UX consistency, accessibility, and developer velocity; structured to support AI-assisted UI generation.
- Drove AI-agent research across the org — evaluating token usage and response predictability.
- Trusted for stakeholder communication in critical and high-visibility situations.
- Improved test coverage and accessibility compliance across the frontend codebase.
- Mentored 5 engineers; onboarded new hires and raised team capability in TypeScript, React, and testing.

work experience

Head of Engineering – Made2Flow

Berlin, Germany | 12/2022 – 07/2023

Sustainability platform for fashion supply-chain decision support.

- Redesigned the core domain data model with the CPO, replacing a fragmented model that blocked product use cases.
- Built and led a team of 4 engineers, hiring 2 and establishing delivery processes.
- Owned technical partner communication, integration planning, and cross-team alignment.

Technical Lead – eHealth-Tec GmbH

Berlin, Germany | 04/2020 – 11/2022

Digital health products for patients, doctors, and pharmacists — regulated environment.

- Built and owned the frontend of a white-label pharmacy platform serving 2 production clients (TypeScript, React, Next.js).
- Designed BFF layers as anti-corruption boundaries, decoupling frontends from upstream service complexity (Node.js, NestJS, REST/GraphQL).
- Introduced ADRs, design reviews, and structured refinement — replacing ad-hoc decisions with a repeatable process that scaled.
- Led stakeholder communication and cross-functional alignment for a team of 4 in an agile setup.
- Delivered a gematik-regulated browser-based e-prescription tool — security-by-design in a regulated, mission-critical context.
- Mentored and onboarded engineers; grew team capability in TypeScript, architecture, and testing.

Head of Engineering – Medtower UG

Berlin, Germany | 09/2018 – 04/2020

Software and hardware solutions for hospital operations and real-time visibility.

- Owned architecture of a real-time IoT platform — microservices, SPA, live device tracking (Node.js, React, TypeScript).
- Designed a multi-device real-time communication system connecting IoT hardware, servers, and browsers via AMQP 1.0 / Apache Qpid.
- Built 3D indoor multi-floor maps with live device location and status visualisation in an offline-capable environment (OpenMapTiles).
- Led a team of 2; established requirements engineering, refinement, and a team knowledge base.
- Managed external consultants for ETL pipeline delivery and integrated outputs into the dashboard layer.

earlier experience

Software Developer – remind me GmbH

02/2018 – 08/2018

Authored the technical concept for the white-label product transformation — adopted and shipped after tenure. Implemented feature-toggle architecture with lazy loading for multi-context deployment. Mentored junior and mid-level developers in a Kanban team of 5.

Software Developer – Cedavis Technology GmbH

08/2009 – 01/2018

Grew sole ownership of frontend architecture over 9 years — introduced Angular 1, then migrated to React and TypeScript as the stack matured. Built a custom D3 chart library for healthcare capacity-planning dashboards. Engineered a PDF reporting module using Java Nashorn to render React components server-side — single shared codebase for live UI and PDF output. Delivered data simulation and forecasting visualisation features.

languages

German (Native) · English (CEFR C-level)

education

Berlin University of Applied Sciences (BHT)

2007 – 2011

Bachelor of Science, Computer Science

certifications

iSAQB Certified Professional for Software Architecture – Foundation

05/2022

oose

Domain Driven Design

12/2021
