HEAD OF ENGINEERING

[linkedin.com/in/tobias-belch](https://www.linkedin.com/in/tobias-belch) | Berlin, Germany

about

Engineering leader with 17 years of experience building and leading engineering teams that deliver web platforms across healthcare, e-health commerce, and sustainability. Spans the full leadership spectrum — from hands-on architecture and delivery to org design, hiring, and cross-functional strategy. Drives engineering organisations through technical vision, process discipline, and team development. Builds trusted stakeholder relationships and creates environments where engineers do their best work.

skills

Leadership & Management

Engineering Org Leadership
Team Building & Hiring
Technical Strategy & Vision
Stakeholder & Partner
Management
Cross-functional Alignment
Mentoring & Career Development
Process Design (ADR, Design
Reviews)

Technical

TypeScript / JavaScript
React.js / Next.js
Node.js / NestJS
Frontend Architecture & Design
Systems
GraphQL / REST APIs
System Architecture & Domain
Modelling
AI Agent Integration & LLM
Optimisation

Strategic & Delivery

Engineering Roadmapping
Platform & Product Strategy
Agile / Lean Delivery
Quality & Testing Strategy
Vendor & Consultant
Management
Technical Due Diligence

languages

German (Native) · English (CEFR C-level)

education

Berlin University of Applied Sciences (BHT)

2007 – 2011

Bachelor of Science, Computer Science

work experience

Senior Software Engineer – DocMorris

Berlin, Germany | 08/2023 – Present

Leading cross-team architecture and AI initiatives at a €900M+ digital healthcare platform.

- Shapes frontend and BFF architecture strategy across teams, influencing technical direction and cross-team standards at org level.
- Architected a white-label platform migration; 3 brands onboarded to date, expanding addressable market through reusable platform capabilities.
- Designed and led a cross-platform Design System improving UX/Dev alignment and enabling AI-assisted UI generation at scale.
- Drove AI agent initiatives across the engineering org — led provider evaluation, token optimisation, reliability tuning, and cost/quality trade-off decisions for production LLM-powered features.
- Acts as trusted escalation point for stakeholder communication in critical, high-visibility situations involving product, operations, and external partners.
- Mentored 5 engineers, onboarded new hires, and raised team capability in TypeScript, React, and testing best practices.

Head of Engineering – Made2Flow

Berlin, Germany | 12/2022 – 07/2023

Built engineering function from scratch at a seed-stage sustainability startup.

- Built and led a cross-functional engineering team of 4, including hiring 2 engineers and establishing engineering processes, code review practices, and delivery cadence from the ground up.
- Designed a next-generation domain data model with the CPO, replacing a fragmented model that constrained product use cases and data-intensive decision-support features.
- Owned technical partner communication and integration planning across external stakeholders in a fast-moving startup environment.
- Established engineering workflows, tooling, and team knowledge base in a resource-constrained setting.

Technical Lead – eHealth-Tec GmbH

Berlin, Germany | 04/2020 – 11/2022

Digital health products for patients, doctors, and pharmacists. Later acquired by DocMorris.

- Built and owned the frontend of a white-label online pharmacy platform serving 2 clients in production (TypeScript, React, Next.js).
- Designed Backend-for-Frontend layers as anti-corruption boundaries, enabling clean domain separation and scalable API contracts (Node.js, NestJS).
- Introduced a requirements-driven architecture process — replaced ad-hoc design with ADRs, design reviews, and structured refinement across the team of 4.
- Led stakeholder communication and cross-functional alignment in a Scrum-lite setup, bridging product, engineering, and external partners.
- Mentored and onboarded engineers, growing team capability in TypeScript, architecture, and testing practices.
- Delivered a gematik-regulated browser-based e-prescription tool for physicians, navigating strict regulatory and data privacy requirements.

work experience

Head of Engineering – Medtower UG

Berlin, Germany | 09/2018 – 04/2020

Software and hardware solutions for hospital operations and real-time visibility.

- Owned architecture and delivery of a real-time IoT platform — microservices, SPA, and live device tracking (Node.js, React, TypeScript).
- Designed a multi-device real-time communication system (IoT hardware, server, web browser) using AMQP 1.0 and Apache Qpid.
- Built 3D indoor multi-floor maps with live device location and status visualisation in an offline environment (OpenMapTiles).
- Led a team of 2 engineers, established requirements engineering, refinement processes, and a team knowledge base.
- Managed external Apache NiFi consultants for ETL pipeline delivery, balancing internal and external resourcing.

earlier experience

Software Developer – remind me GmbH

02/2018 – 08/2018

Authored the technical concept for a white-label product transformation — adopted and shipped after tenure. Implemented feature-toggle architecture with lazy loading for flexible multi-context deployment. Mentored junior and mid-level developers in a Kanban team of 5.

Software Developer – Cedavis Technology GmbH

08/2009 – 01/2018

Evolved sole ownership of frontend architecture over 9 years — introduced Angular 1, then migrated to React and TypeScript. Built a custom D3 chart component library from scratch. Engineered a PDF reporting module using Java Nashorn to render React components server-side, enabling a single shared codebase for live UI and PDF output. Implemented data simulation and forecasting features for healthcare capacity planning.

certifications

iSAQB Certified Professional for Software Architecture – Foundation

05/2022
