

TobiasBelch

ENGINEERING MANAGER

[linkedin.com/in/tobias-belch](https://www.linkedin.com/in/tobias-belch) | Berlin, Germany

about

Engineering manager and technical leader with 17 years of experience delivering web platforms across healthcare, e-health commerce, and sustainability. Combines team leadership with hands-on TypeScript, React, and Next.js expertise across frontend and backend layers. Drives engineering organisations through architecture strategy, Design System initiatives, and AI agent integration. Builds and mentors teams, owns stakeholder communication in high-visibility situations, and raises collective delivery quality and velocity.

skills

Management & Leadership

Engineering Management
Team Building & Hiring
Technical Strategy & Architecture
Stakeholder Communication
Mentoring & Career Development
Cross-functional Collaboration
Process Improvement (ADRs,
Design Reviews)

Technical

TypeScript / JavaScript
React.js / Next.js
Node.js / NestJS
GraphQL / REST APIs
Frontend Architecture & Design
Systems
Material UI / Tailwind / SCSS
Jest / Cypress / Playwright
LLM Integration & AI Agent
Orchestration

Supporting

Redux / State Management
D3 / Data Visualisation
Docker / Git
AMQP / Apache Flink / NiFi
Java

languages

German (Native) · English (CEFR C-level)

education

Berlin University of Applied Sciences (BHT)

2007 – 2011

Bachelor of Science, Computer Science

work experience

Senior Software Engineer – DocMorris

Berlin, Germany | 08/2023 – Present

Digital healthcare and online pharmacy platform serving the German market. €900M+ revenue company.

- Architected and delivered a white-label migration of the pharmacy platform; 3 brands onboarded to date, expanding addressable market.
- Drove frontend and BFF architecture evolution, shaping technical direction across the full stack and influencing cross-team standards.
- Trusted escalation point for stakeholder communication in critical, high-visibility situations involving product, operations, and external partners.
- Designed and led implementation of a cross-platform Design System, improving UX/Dev alignment and enabling AI-assisted UI generation at scale.
- Drove AI agent initiatives across the engineering org — researched and optimised token usage, reliability, and response predictability for production use.
- Mentored 5 engineers, onboarded new hires, and raised team-wide capability in TypeScript, React, and testing best practices.
- Improved test coverage and accessibility compliance across the frontend codebase, reducing regression risk.

Head of Engineering – Made2Flow

Berlin, Germany | 12/2022 – 07/2023

Sustainability platform for fashion supply-chain decision support. Seed-stage startup.

- Built and led a team of 4 engineers, including hiring 2, establishing engineering processes from the ground up.
- Designed a next-generation domain data model with the CPO, replacing a fragmented model that constrained product use cases.
- Owned technical partner communication and integration planning, ensuring alignment across external stakeholders.
- Established engineering workflows, code review practices, and delivery cadence in a fast-paced startup environment.

Technical Lead – eHealth-Tec GmbH

Berlin, Germany | 04/2020 – 11/2022

Digital health products for patients, doctors, and pharmacists. Later acquired by DocMorris.

- Built and owned the frontend of a white-label online pharmacy platform serving 2 clients in production (TypeScript, React, Next.js).
- Designed Backend-for-Frontend layers as anti-corruption boundaries, enabling clean domain separation (Node.js, NestJS).
- Introduced a requirements-driven architecture process — replaced ad-hoc design with ADRs, design reviews, and structured refinement across the team.
- Led stakeholder communication and cross-functional alignment for a team of 4 in a Scrum-lite setup, bridging product and engineering.
- Mentored and onboarded engineers, growing team capability in TypeScript, architecture, and testing practices.
- Delivered a gematik-regulated browser-based e-prescription tool for physicians, navigating strict regulatory requirements.

work experience

Head of Engineering – Medtower UG

Berlin, Germany | 09/2018 – 04/2020

Software and hardware solutions for hospital operations and real-time visibility.

- Owned architecture and delivery of a real-time IoT platform — microservices, SPA, and live device tracking (Node.js, React, TypeScript).
- Designed a multi-device real-time communication system (IoT hardware, server, web browser) using AMQP 1.0 and Apache Qpid.
- Built 3D indoor multi-floor maps with live device location and status visualisation in an offline environment (OpenMapTiles).
- Led a team of 2 engineers, established requirements engineering, refinement processes, and a team knowledge base.
- Managed external Apache NiFi consultants for ETL pipeline delivery, balancing internal and external resourcing.

earlier experience

Software Developer – remind me GmbH

02/2018 – 08/2018

Authored the technical concept for a white-label product transformation — adopted and shipped after tenure. Implemented feature-toggle architecture with lazy loading for flexible multi-context deployment. Mentored junior and mid-level developers in a Kanban team of 5.

Software Developer – Cedavis Technology GmbH

08/2009 – 01/2018

Evolved sole ownership of frontend architecture over 9 years — introduced Angular 1, then migrated to React and TypeScript. Built a custom D3 chart component library from scratch. Engineered a PDF reporting module using Java Nashorn to render React components server-side, enabling a single shared codebase for live UI and PDF output. Implemented data simulation and forecasting features for healthcare capacity planning.

certifications

iSAQB Certified Professional for Software Architecture – Foundation

05/2022
